

2011

Birch Street pedestrian bridge over STH 29 (Federal & state funds awarded)

Schofield Ave. reconstruction from Ryan to CTH J
(Federal Funds awarded)

Camp Phillips Road water main

Alderson Street reconstruction between Weston Avenue and Howland Avenue – The Village is planning a cooperative project with Rothschild to reconstruct as much of this rural street as possible. The limiting factor will be the amount of money borrowed by Rothschild for their 50% share. Options are being evaluated.

Crestwood Acres reconstruction (Kirk, Douglas, Rodney, Randy Jay, Robin, Everest, Kathleen, Monterrey). The streets in this subdivision are in need of attention, but the drainage in the area must be fixed. The Village will also take the opportunity to replace the water and sanitary sewer mains with the street being reconstructed. **There will be special assessments** for the street reconstruction and culvert replacements if needed.

2012

Alderson Street Reconstruction from Ross to Mallard. - This will be a joint project with the City of Schofield. The project was originally considered for 2011, but is being deferred to 2012 to avoid conflict with the Camp Phillips Road project. **There will be special assessments** for street reconstruction on the Weston half of the project.

Park Ridge Subdivision Reconstruction (Park Ridge, Labrador, Boxer, Setter, Shepherd) – This is a project that can be done economically with the Village's own forces. **There will be special assessments** for the street reconstruction and culvert replacement if needed

New drinking water well construction
