Water mains will be flushed between 8:00 AM and 3:00 PM on these dates. You may notice that your water has a reddish color or tint during or following the flushing. This discoloration should be eliminated shortly after you have run water through your own service line. If the discoloration persists, please contact our office.

Those with sensitive water needs should draw water before the hours of flushing to reduce the chance of discolored water. White laundry should not be washed while the mains are being flushed in your area. Hydrants may be flushed on Fridays to keep up with the schedule. You may notice a change in water pressure while hydrants are flushed in your area.

Please call our office at 359-2876 to check for any changes in the flushing schedule or if you have specific concerns.
