

CHIPSEALING

Beginning **Tuesday, June 25**, Fahrner Asphalt Sealers will begin the chip seal operation on various streets throughout the Village. The application of oil, followed by stone “chips” will occur over a one week period to be completed by Tuesday, July 1, weather permitting (cool and/or wet weather will delay start and completion). Chip seal will be applied on the following streets:

Linda Street, Lee Avenue, Scott Street, Jean Ellen, Sternberg (Von Kanel to Lora Lee), Zadra, James Lee Street, Pat Street, Powers, Kiowa, Apache, River Bend, Trotzer, Fuller, Schofield Avenue (CTH J to Ringle line), Alderson (Schofield Avenue to Ross), Shorey (Alderson to Birch and Heeren to east of CTH X), and Northwestern Avenue (CTH X to Village Limits).

Immediately after the chip seal application, there will be loose stones/chips on the streets, despite the use of a heavy roller. However, one to two weeks after the initial chip seal application the remaining loose stones/chips will be swept up and removed. The Village asks for your patience as this sometimes messy process is completed.
